

Special Issue

Skin Cancer: Epidemiology, Management and New Therapies

Message from the Guest Editors

Skin Cancer represents a constant diagnostic and therapeutic challenge, with important implications on the treatment process of affected patients. In particular, Skin Cancer is divided into Melanoma and Non-Melanoma Skin Cancer (NMSC) represented particularly by Basal Cell Carcinoma (BCC), Squamous Cell Carcinoma (SCC), Merkel Cell Carcinoma (MCC) and adnexal tumors, as well as pathologies such as primitive lymphoproliferative disorders of the skin. In this Special Issue, we invite colleagues to submit their contributions in the form of Original Articles, Reviews and Systematic Reviews that shed light on innovative or hitherto neglected aspects of Skin Cancer, to improve and refine the knowledge on these topics.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
