Innovative Strategies and Techniques in Diagnosing, Treating and Surveying Soft Tissue Sarcomas

Message from the Guest Editor

Although soft tissue sarcomas are rare, if properly and expeditiously diagnosed and treated, survival is improved. This Special Issue will focus on new and innovative and combined strategies and techniques in diagnosing and treating soft tissue sarcomas in adults and children. While open biopsy has been the “standard of care” in diagnosing soft tissue sarcomas, other biopsy techniques and the role of exosomes and molecular markers in diagnosing and characterizing sarcomas are prescient and should be brought into clearer focus. Other important issues are late effects of therapy, surgery, radiotherapy, and chemotherapy, as well as quality of life issues in long-term survivors. This Special Issue aims to highlight and demonstrate new methods and strategies to diagnose and treat soft tissue sarcomas in children and adults. In this Special Issue, original research articles and reviews are welcome. Research areas may include new or established methods and strategies that are novel in diagnosing, treating, and surveying soft tissue sarcomas in children and adults. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
