Special Issue

Metastasis in Tumor Immunity: Current Perspectives

Message from the Guest Editors

Cancer metastasis remains the most lethal attribute of tumors and critically limits therapeutic options and patient survival. One key feature of cancer cells and a prerequisite in efficient tumor growth and metastasis is the ability to evade immunological recognition. Importantly, the specific mechanistic interplay of metastasis-enabling tumor cells with the immune system is often overlooked in favor of a broader immune-oncological context. Furthering our understanding of these interactions will allow a better assessment of the risk of individual cancers and enable specific intervention strategies. This Special Issue will provide a platform to share basic, translational and clinical developments focusing on metastatic processes and immune evasion.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
