Diagnosis and Treatment of Early GI Cancers (Esophageal, Gastric, and Colorectal Cancer)

Message from the Guest Editor

Gastrointestinal (GI) cancers are the group of cancers that affect the digestive system. These malignancies constitute the third most frequent cancers worldwide, while colorectal, gastric, and esophageal cancer are the most commonly diagnosed GI malignancies. The aim of this Special Issue is to provide new findings regarding biomarkers that could improve the diagnosis and treatment of GI cancer patients and to resume their potential clinical application in early detection. This Special Issue will highlight the current state-of-the-art in present and future prospects of biochemical and imaging detection, as well as legal aspects of the diagnosis and treatment of GI cancers (esophageal, gastric, and colorectal cancer).

Guest Editor

Dr. Marta Lukaszewicz-Zajac

Department of Biochemical Diagnostics, Medical University of Białystok, 15-089 Białystok, Poland

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
