

Special Issue

Estrogen Receptor-Positive (ER+) Breast Cancers

Message from the Guest Editors

This Special Issue focuses on the biology of ER and the implications of ESR1 mutations in HR+ breast cancer, the role of neoadjuvant therapy, the use of multigene assays to select treatment for early disease, the optimal management of premenopausal patients with ER+ breast cancer, the role of extended adjuvant endocrine therapy, the molecular mechanisms mediating endocrine resistance emphasizing the prominent role of the PI3K/Akt/mTOR and CDK4/6/retinoblastoma protein pathways in cancer cell growth and survival, the molecularly targeted agents to overcome or delay endocrine resistance, and potential predictive biomarkers for accurate patient stratification.

Guest Editors

Prof. Dr. Christos Papadimitriou

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
