

Special Issue

The Up-to-Date of Endoscopic Submucosal Dissection (ESD) in Early Cancers

Message from the Guest Editor

As the main cause of mortality in elderly patients after curative sections is noncancer-related death, in elderly patients and/or those with severe underlying diseases, additional surgery should be considered carefully when selecting a post-ESD treatment strategy for patients undergoing non-curative resection. Accumulating retrospective and prospective data is needed to resolve such remaining issues even within the maturation of technical aspects and is the focus of this Special Issue, “ESD to Date”, where we would like to summarize the most recent studies on gastrointestinal ESD from the standpoint of earlier cancer management and perspectives to resolve various issues in the context of an increasingly aging society.

Guest Editor

Prof. Dr. Hajime Isomoto

Division of Gastroenterology and Nephrology, Department of Multidisciplinary Internal Medicine, Faculty of Medicine, Tottori University, Yonago, Japan

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
