New Trends in Esophageal Cancer Management

Message from the Guest Editors

Esophageal cancer retains the reputation of a poor prognosis, due to a generally evolved stage at the time of diagnosis, of a terrain often altered by multiple co-morbidities, of its rapid impact on the general state, particularly nutritional, and of the need for cumbersome combinations of treatments, in particular complex surgery. However, much progress has been made over the last few decades. The objective of this Special Issue is to provide an overview of the current management of esophageal cancer concerning pre-treatment assessment, perioperative treatment, nutritional management, surgical treatment, and special situations. Its ambition is to be an aid in the daily practice of physicians confronted with esophageal cancer.

Guest Editors

Prof. Dr. Caroline Gronnier

Department of Digestive Surgery, Magellan Center, Bordeaux University Hospital, 33600 Pessac, France

Prof. Denis Collet

Oeso-Gastric Surgery Unit, Magellan University Hospital, Bordeaux, France

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
