

# Special Issue

## Parenting and Cancer

### Message from the Guest Editors

On behalf of the Italian Society of Psycho-Oncology (SIPO), we would like to propose a Special issue entitled 'Parenting and Cancer' to be published in *Cancers*. We feel this topic of great potential interest to all those involved in clinical care of cancer patients. Cancer affects an ever increasing number of adults and young adults with parent-dependent children throughout the world and parenting concerns may seriously add to disease-related distress, worsen quality of life and hinder psychosocial adjustments to disease and treatments. Similarly, recognizing and handling the impact of parental cancer on psychosocial 'functioning' of children and adolescents represent in turn critical issues as to overall management of neoplastic diseases. To provide a comprehensive coverage of issues related to parenting and cancer, we plan to design the Special Issue by including articles prepared by recognized experts in the field within the SIPO. Obviously, the issue will accommodate additional contributions from other experts following a proper announcement and promotion on *Cancers*.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
