

Special Issue

Parenting and Cancer

Message from the Guest Editors

On behalf of the Italian Society of Psycho-Oncology (SIPO), we would like to propose a Special issue entitled 'Parenting and Cancer' to be published in *Cancers*. We feel this topic of great potential interest to all those involved in clinical care of cancer patients. Cancer affects an ever increasing number of adults and young adults with parent-dependent children throughout the world and parenting concerns may seriously add to disease-related distress, worsen quality of life and hinder psychosocial adjustments to disease and treatments. Similarly, recognizing and handling the impact of parental cancer on psychosocial 'functioning' of children and adolescents represent in turn critical issues as to overall management of neoplastic diseases. To provide a comprehensive coverage of issues related to parenting and cancer, we plan to design the Special Issue by including articles prepared by recognized experts in the field within the SIPO. Obviously, the issue will accommodate additional contributions from other experts following a proper announcement and promotion on *Cancers*.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
