

## Special Issue

# Metronomic Chemotherapy in Cancer Treatment

### Message from the Guest Editor

Dear Colleague,

Despite profound progress in cancer treatment and the development of many novel molecularly targeted agents, chemotherapy remains the backbone and most often used form of systemic therapy for oncological malignancies. Metronomic chemotherapy represents a unique chemotherapeutic treatment modality that utilizes single- or multi-agent regimens, administered in short or ultra-short intervals. Moreover, metronomic chemotherapy may represent a unique therapeutic partner for many targeted agents, and this concept is being evaluated in many recently initiated clinical studies.

The focus of this Special Issue includes the following:

(a) describe the mechanisms of the action of metronomic chemotherapy; (b) present the potential of metronomic chemotherapy in the treatment of various cancers; (c) discuss the role of metronomic chemotherapy as a partner for novel strategies, combining it with molecularly targeted agents and immunotherapies; (d) underscore the role of metronomic chemotherapy in low- and middle-income countries, where, in many cases, it may offer an alternative to the novel, financially unavailable cancer treatments.

---

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
