

## Special Issue

# Hereditary Breast Cancer in Men and Women: Genetic Mutations, Cancer Risk and Treatment

### Message from the Guest Editors

This Special Issue will focus on the genetics of breast cancer in men and women, with the aim to provide more insight on the role of genetic factors in breast cancer risk assessment and as predictive biomarkers for personalized therapy. For this Special Issue of *Cancers*, we welcome research articles describing novel data, methods, collaborative initiatives, editorials, and reviews related to these topics. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
