Gastric Cancer Metastasis

Message from the Guest Editor

Gastric cancer is an important threat to health worldwide. Key biological characteristics of gastric cancer include invasion and metastasis, which are the main factors responsible for postoperative recurrence and the development of therapeutic resistance. Metastatic gastric cancer is difficult to cure, mainly because of its heterogeneity, immune escape, and complicated tumor microenvironment, among other factors. Studies focused on the mechanisms that underlie the metastasis of gastric cancer have attracted extensive attention, but these mechanisms have not been fully elucidated. This Special Issue aims to gain deeper insight into molecular mechanisms of metastasis in gastric cancer and provide a new strategy for the treatment of advanced gastric cancer with invasion and metastasis.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
