

Topical Collection

Diagnosis, Treatment and Prevention of Gastrointestinal Cancer

Message from the Collection Editors

The discovery of novel strategies for gastrointestinal cancer diagnosis, treatment and prevention remains a matter of utmost importance. In our efforts to develop effective therapies and anti-cancer drugs, recent research has focused on innovative molecular, biochemical, pathological and immunological developments. In this respect, investigation of the mechanisms of carcinogenesis is crucial to developing cancer screening methods and therapies for application in clinical practice. Furthermore, the discovery of new chemopreventive agents can also help in the fight against cancer. This Topical Collection will present an overview of the most recent studies on advancements in diagnosis, anti-cancer drugs and chemopreventive agents for gastrointestinal cancers. Topics of interest include 1) cancer diagnosis, 2) carcinogenesis models for the discovery of cancer risk factors, innovative drugs and chemopreventive agents, 4) investigation of molecular mechanisms of carcinogenesis, 5) discovery of novel cancer biomarkers and molecular targets, and 6) preclinical innovative studies.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
