Palliative Radiotherapy of Cancer

Message from the Guest Editors

Palliative radiotherapy plays a critical role in alleviating symptoms and improving the quality of life for cancer patients, particularly those with advanced or metastatic disease. Recent advancements in radiotherapy techniques have enhanced the precision of treatments, reducing side effects while optimizing symptom relief. This Special Issue will focus on optimizing the efficacy and accessibility of palliative radiotherapy. We welcome contributions on modern radiotherapy techniques, predictive models for treatment outcomes, and the integration of radiotherapy with comprehensive palliative care. Additionally, addressing barriers to accessing palliative radiotherapy and strategies to overcome these challenges will be of great interest. We invite both original research and literature reviews to further expand the understanding and application of palliative radiotherapy in cancer care.

Guest Editors

Prof. Dr. Alessio Giuseppe Morganti

Dr. Costanza Maria Donati

Dr. Romina Rossi

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
