Innovative Approaches to Minimally Invasive Surgical Techniques in Thoracic Oncology

Message from the Guest Editors

The development of new technologies is changing the world of surgery, providing innovative tools for diagnostics and interventions. In particular, the application of new tools and techniques in the field of thoracic surgical oncology may improve patients' outcomes in the short and long term. There are many fields, in which these developments are constantly growing. The best examples are the fields of virtual, mixed, and augmented reality. These new frontiers are developing fast and can be implemented in medical education, pre-operative planning, and intraoperative assistance. In this Special Issue of *Cancers*, we welcome original research articles or comprehensive review articles that focus on development and applications of new approaches in minimally invasive thoracic surgical oncology. We hope that this collection of papers will provide an overview of new perspectives of the future of minimally invasive thoracic surgery.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
