

Special Issue

Intestinal Cancers and Surgery in Inflammatory Bowel Diseases

Message from the Guest Editors

Crohn Disease (CD) and Ulcerative Colitis (UC) are Inflammatory Bowel Diseases of unknown etiology, characterized by a relapsing clinical course. The purpose of this special issue is to collect studies from IBD-dedicated gastroenterologists and surgeons, possibly integrated, to discuss over the current indications for surgical treatments in patients with CRC and IBD. We hope to be able to receive works that can possibly clarify the current risk factors for CRC in IBD, as also the best surgical management of CRC in UC and Crohn's colitis. All these, in view of the changes in the medical and surgical perspectives in IBD, and with a close eye to the quality of life and cost-effectiveness.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
