Relevant Prognostic Factors in Gastric Cancer

Message from the Guest Editor

From a research perspective, I conducted fundamental research on apoptosis and other related issues. I have focused on minimally invasive surgery, including robotic surgery, for benign and malignant diseases of the esophagus and stomach. In addition, I have clinical interests in chemotherapy as well as surgery and nutritional assessments aimed to improve the quality of life and prognoses of patients. In clinical research, I clarified prognostic factors for cancer and developed new prognostic markers.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
