

## Special Issue

# Human Carcinogens—Chemical Agents, Occupational Exposure and Health Impact

### Message from the Guest Editor

Occupational and environmental exposure to chemical agents constitutes a significant public health issue globally. Numerous chemicals commonly encountered in various occupational settings have been identified as human carcinogen, impacting workers across diverse industries. Understanding the mechanisms, exposure–response relationships, early detection, and preventive strategies for occupational cancers is critical to improving workplace safety and public health outcomes. This Special Issue seeks original research articles, comprehensive reviews, and perspective papers exploring the identification and characterization of chemical carcinogens, methods for occupational exposure assessment, epidemiological evidence linking exposure and cancer outcomes, and effective intervention measures. We invite contributions focusing on novel methodologies, biomarkers for early detection, regulatory aspects, risk assessment models, and the latest advancements in occupational cancer research.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
