Novel Advancements in Prostate Cancer Surgery: Indications and Techniques

Message from the Guest Editors

Radical prostatectomy has been the main treatment option for prostate cancer for nearly a century. Nonetheless, several advancements have been made in terms of indications, techniques, and approaches, particularly over the past decade, with an aim to reduce invasiveness and improve outcomes. The introduction of the Single-Port Robotic System and the integration of Artificial Intelligence in the surgical workflow are just some examples of such innovations. Articles in the current Issue explore the latest changes and future perspectives in prostate cancer surgical management, reflecting the synergy between state-of-the-art technology and surgical expertise.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
