

Special Issue

Advances in the Early Diagnosis and Treatment of Gastric Cancer

Message from the Guest Editor

This Special Issue aims to present cutting-edge research and insights that shed light on innovative methods, technologies, and strategies to detect and treat gastric cancer at its earliest stages. Gastric cancer, which is often diagnosed late due to its subtle early symptoms, remains one of the most challenging malignancies to treat effectively. Thus, early detection and intervention are crucial in improving survival rates and quality of life for patients. We welcome comprehensive original research studies, reviews, and meta-analyses that provide new perspectives or synthesize existing knowledge in this field.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
