Endoscopic Management of Gastrointestinal, Hepatobiliary and Pancreatic Malignancies

Message from the Guest Editors

Endoscopic management has become a cornerstone in the clinical care of patients with gastrointestinal, hepatobiliary and pancreatic malignancies, and its role in this regard continues to expand. These malignancies constitute a large, heterogeneous, and impactful group of diseases and, as such, the benefits of endoscopy as a minimally invasive platform, be it in diagnosis, staging, curative treatment, or palliation, are far-reaching at an individual and public health level. Despite the fact that endoscopic management used to be limited to diagnostic luminal endoscopy, modalities and interventions such as endoscopic ultrasound, endoscopic retrograde cholangiopancreatography, cholangioscopy, stenting, ablation, resection, etc., have opened new horizons and paved vital care pathways for patients. This Special Issue aims to highlight the advances, challenges, and trends in the endoscopic management of gastrointestinal, hepatobiliary, and pancreatic malignancies, with the aim of improving and expanding existing approaches, inspiring new ones, and providing greater options for patients with these malignancies.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
