

Special Issue

Immunohistochemistry in Translational Research and Diagnostics of Breast Cancer

Message from the Guest Editors

The focus of this Special Issue is, therefore, hypothesis-driven research of molecular mechanisms of BC that might result in identification of such biomarkers. Original reports on mechanistic studies of molecular regulators of BC progression and resistance to currently available therapies, evaluating their clinical value as potential subtype-specific immunohistochemical markers of prognosis and prediction in BC, are particularly welcome.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
