

## Special Issue

# Gastrointestinal and Its Associated Malignancies: Diagnosis, Targets and Therapies

### Message from the Guest Editors

Gastrointestinal cancers constitute a heterogenous and aggressive group of malignancies characterized by high relapse rates. They are ranked as the third-leading cause of cancer-related deaths, and this emphasizes the pressing need for advancements in both their diagnosis and treatment strategies. Unfortunately, a significant number of patients face late-stage diagnoses due to the unremarkable nature of early symptoms and the limited prevalence of regular screenings. Diagnostic procedures include a range of techniques such as endoscopy, barium swallow, CT, NMR, PET/CT scans, and biomarker testing, as well as MRI with gadolinium and laparoscopy. This delayed identification, coupled with the constraints of available therapies, contributes to a grim prognosis, especially for individuals with advanced gastric cancer, resulting in a short lifespan of approximately one year. Standard treatment modalities involve radiotherapy, chemotherapy, and targeted therapy, yet their effectiveness is impeded by challenges like multi-drug resistance and tumor relapse.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
