

## Special Issue

# Neurosurgical Management of Gliomas

### Message from the Guest Editor

Neurosurgical management plays a critical role in the treatment of gliomas, which are tumors that arise from the glial cells in the brain. The primary objective of neurosurgical intervention is to safely remove as much of the tumor as possible while preserving neurological function. Surgery is often the first-line treatment for gliomas, aiming to achieve maximal safe resection. Moreover it provides material for the histo-molecular analysis of the tumor leading to the best medical management. The extent of tumor removal depends on various factors, such as the tumor location, size, and proximity to vital brain structures and may require different tools as intraoperative monitoring in awake condition, intraoperative imaging or fluorescence-guided surgery. The goal is to remove as much of the tumor as possible to alleviate symptoms, reduce tumor burden, and potentially improve patient outcomes. This special issue hopes to benefit the neurosurgical management of gliomas.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
