# Surgical Management of Gastric Cancer: New Insights and Future Prospectives

### Message from the Guest Editors

Surgery still represents the cornerstone of treatment for gastric cancer. During the last decades, the improvement of multimodal treatments and the promising results achieved with minimally invasive approaches have ameliorated oncological outcomes and surgery sustainability for patients. This topic aims to offer a comprehensive overview of recent technological applications, advances, challenges, and future perspectives concerning the surgical treatment of gastric cancer. We invite manuscripts that contain both reviews and original articles. Potential topics include, but are not limited to, laparoscopic gastrectomy, robotic gastrectomy, the endoscopic treatment of early gastric cancer, the use of new technological tools (i.e., fluorescence-guided surgery), minimally invasive approaches, and endoscopic approaches for the treatment of gastric surgery complications.

## **About the Journal**

### Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

#### **Editor-in-Chief**

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
