Special Issue

The Role of Anatomical Resections in Secondary Lung Cancer: Indications, Techniques, and Outcomes

Message from the Guest Editors

The management of secondary lung cancer, or pulmonary metastases, presents unique challenges for thoracic surgeons, particularly in determining the optimal surgical approach. This Special Issue focuses on the role of anatomical resections, such as segmentectomy and lobectomy, in the treatment of secondary lung cancer. Emphasis will be placed on the indications for these procedures, including considerations of oncologic outcomes, pulmonary function preservation, and patient-specific factors. By exploring advancements in surgical techniques, including minimally invasive approaches, this Special Issue aims to provide a comprehensive understanding of how anatomical resections contribute to improving survival and quality of life in patients with secondary lung cancer.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
