

Special Issue

Interventional Oncology: Advances in Cancer Care

Message from the Guest Editor

As one of the most rapidly evolving fields in cancer treatment, interventional oncology combines cutting-edge minimally invasive techniques with advanced imaging to precisely target tumors. This Special Issue aims to highlight recent innovations, clinical applications, and future trends in interventional oncology, with a focus on improving patient outcomes. We invite researchers, clinicians, and specialists to contribute original research, reviews, and case reports that explore novel therapies, breakthroughs in imaging technology, and emerging interventional strategies. Topics of interest include, but are not limited to, the following:

- Ablative techniques (radiofrequency, microwave, cryoablation, etc.);
- Bland embolization, radioembolization, and chemoembolization;
- Image-guided drug delivery;
- Innovations in tumor-targeting technologies;
- Combined interventional and systemic treatments;
- Advances in clinical outcomes and quality-of-life improvements.

Guest Editor

Dr. Mina S. Makary

Division of Vascular and Interventional Radiology, Department of Radiology, The Ohio State University Medical Center, Columbus, OH 43240, USA

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
