

## Special Issue

# Liver Cancer: Current Surgical Management

### Message from the Guest Editor

Liver cancers, including hepatocellular carcinoma (HCC), are one of leading causes of cancer-related deaths worldwide. Liver transplantation is generally considered the most curative treatment, but it is limited by the imbalance between the number of recipients and available donors. More recently, laparoscopic liver resection has been developed and widely accepted as the standard care of treatment for liver tumors. We are pleased to invite you to contribute to this Special Issue titled “Liver Cancer: Current Surgical Management.” This Special Issue aims to investigate the current standards for the treatment of liver cancer, technical improvement, and the expert’s perspectives of the treatment of liver cancer. Both original research articles and reviews are welcome. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
