

Special Issue

Emerging Concepts in Treatment of Laryngeal Cancer

Message from the Guest Editors

Dear Colleague,

This Special Issue will focus on emerging concepts in the multimodal treatment approach to laryngeal squamous cell carcinoma, starting from its precise pre- and intraoperative bio-endoscopic assessment and radiologic evaluation by magnetic resonance with surface coils. Radiomics is making its way also in this field, and promising nuances are already at hands. In-depth analysis of different surgical as well as non-surgical organ preservation strategies will be carried out, with special emphasis given to how to reduce the number of wrong therapeutic planning decisions in a multidisciplinary team setting. Big data, genomics, and proteomics are promising aids in such a direction and could be soon used to implement the existing TNM staging system. At a minimum, however, there is already multiple evidence that such an essential prognostic tool can be greatly improved by introducing just some of the new anatomic and therapeutic concepts developed in the last 5–10 years.

- laryngeal cancer
- transoral laser microsurgery
- radio/chemo/immuno-therapy
- IMRT/VMAT
- omics

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
