Special Issue

Lifestyle, Environment and Respiratory Cancer Risk

Message from the Guest Editors

Cancers risk appears to evolve over time as a possible result of changes in dietary, environmental and lifestyle factors, including bacterial infection, diet, drug abuse, radiations and stress; however, the etiology of cancer is complex; bacterial variability, host genetics and environmental factors are the strongest risk factors for the development of carcinoma. This relationship suggests that a need exists to investigate the mechanism as to how these factors combined with host factors might contribute to initiate cancer development. Therefore, through this Special Issue, "Lifestyle, Environment and Respiratory Cancer Risk", we aim to highlight the relationship between lifestyle and environmental risk factors and cancer. We encourage contributions that are focused on, but not limited to, the following themes:

- Lifestyle factors (nutrition, tobacco use, physical activity):
- Natural occurring exposures (ultraviolet light, gas, infectious agents);
- Medical treatments (radiation and medicine);
- Workplace and household exposures;
- Pollution:
- Respiratory cancer risk factors.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
