

Special Issue

Image-Guided Treatment of Liver Tumors

Message from the Guest Editors

Image-guided therapies have transformed the landscape of liver tumor treatment, offering minimally invasive options with increased precision and improved patient outcomes. These therapies—ranging from ablation techniques such as microwave ablation and irreversible electroporation to vascular interventions like radioembolization with yttrium-90 microspheres, chemoembolization, portal vein embolization, and double vein embolization—are rapidly evolving with advances in imaging, technology, and interdisciplinary collaboration. This Special Issue of *Cancers* aims to highlight recent innovations, clinical outcomes, and translational research in the field of image-guided treatment of liver tumors (both primary liver tumors and liver metastases). We welcome original research articles, comprehensive reviews, and case-based insights that explore novel techniques, procedural optimization, and combination strategies that enhance therapeutic efficacy and patient selection. We are looking forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
