

# Special Issue

## Liver Metastasis of Cancer

### Message from the Guest Editor

Liver metastases: the evolution of understanding the mechanisms, diagnosis and treatment options. This Special Issue will focus on describing historically how our understanding of the mechanisms of disease has evolved and what future directions are needed. We will also describe the evolution of the diagnosis of the disease and how new technologies, such as liquid biopsies (ctDNA, CTCs, EVs) and biobanks, have advanced our ability to diagnose the disease and its recurrence, as well as to introduce new treatment options. In another chapter, we will explore different treatment options which have arisen over the years, from chemotherapy to targeted therapy and surgical interventions, and how both modalities have improved. We will also explore the impact on overall survival and progression-free survival with respect to quality of life and the direction of clinical trials. All chapters in this Issue will focus on the impact different components have had on modeling clinical trials and their impact, the lesson learned, and the next steps. Finally, the last chapter will encompass patients' perspective on treatment options. For this, we will reach out to patient advocacy groups.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
