

Special Issue

Molecular Profiling, Detection, and Therapy of Squamous Cell Carcinomas

Message from the Guest Editors

For this Special Issue, we welcome original research articles and reviews that focus on (but not exclusively): profiling of SCCs that help unravel the complex molecular mechanisms underlying tumor development and progression; biomarkers that will improve detection, diagnosis and prediction of therapeutic success; and immune, cell or gene therapeutic approaches to combat SCCs. We also encourage the submission of scientific work that employs innovative technologies to investigate these aspects. We look forward to your valued contributions to this special issue.

Guest Editors

Dr. Josefina Pinon Hofbauer

Dr. Christina Guttman-Gruber

Dr. Verena Wally

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
