Multidisciplinary Strategies in Challenging Neuro-Oncological Surgery

Message from the Guest Editor

We can announce the publication of a Special Issue entitled “Multidisciplinary Strategies in Challenging Neuro-Oncological Surgery” and invite submissions from researchers and clinicians worldwide. Neuro-oncological surgery is a field within cancer treatment that demands particularly advanced technical skills and judgment. In challenging cases, the integration of multidisciplinary techniques, including surgical procedures such as awake craniotomy, intraoperative support technologies (MRI navigation systems, intraoperative MRI/CT/DSA, intraoperative ultrasound, etc.), intraoperative diagnoses/therapies (intraoperative pathological diagnosis, intraoperative photodynamic diagnosis/therapy, intraoperative chemotherapy/molecularly targeted therapy/viral therapy/immunotherapy/radiotherapy, etc.), expands the possibilities for novel treatment strategies and contributes to improved patient outcomes. This Special Issue welcomes original research articles and review papers focusing on multidisciplinary collaboration, including clinical research, basic research, case series, and technological innovations.

Guest Editor

Dr. Eiichi Ishikawa

Department of Neurosurgery, Institute of Medicine, University of Tsukuba, 2-1-1, Amakubo, Tsukuba 305-8576, Ibaraki, Japan

Deadline for manuscript submissions

20 August 2026

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
