

## Special Issue

# Metastatic Brain Tumors Research

### Message from the Guest Editor

Dear Colleague, Over recent years, the incidence rates of brain metastatic disease have risen to levels comparable to those of primary brain tumors. Nevertheless, clinical efforts in trials on brain metastatic disease remain relatively understudied, just as initiating basic research projects on this topic. In addition to significant variations between different tumor lineages and primary sites giving rise to brain metastases, many still unknown factors seem to influence the likelihood for developing this fatal complication. The development of therapeutic—or preventive—strategies is in urgent need of basic scientific data. This Issue presents a cross section of the various fronts of current research activity in this highly varied and complicated field.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
