The Molecular Basis of Thyroid Cancer

Message from the Guest Editors

Thyroid cancer is by far the most common endocrine malignancy. Significant advances in the molecular characterization have improved our understanding of the molecular mechanisms driving thyroid cancer. This Special Issue aims to provide our current understanding of and new insight into the molecular basis of thyroid cancer of all types. Research areas may include (but are not limited to) the following: insight into the molecular basis of all forms of aggressive and indolent thyroid cancers. Various topics associated with thyroid cancer including the role of environmental factors, hereditary predisposition, and genetic, epigenetic, and histopathologic changes in thyroid cancer, and their potential clinical implications, and in predicting therapeutic; early detection of thyroid cancer or recurrence, mechanisms of development of resistance to therapy are welcome.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
