Special Issue

Emerging Trends in Global Cancer Epidemiology

Message from the Guest Editor

Understanding global trends in cancer incidence, mortality, prevalence, and survival across diverse populations is crucial in the field of cancer epidemiology and in identifying risk factors and potential preventive strategies. Over the past few decades, there have been many advances in cancer epidemiological research, including the use of large-scale data sets, new statistical methods, and innovative approaches to study design and analysis. This Special Issue seeks to publish original research articles, reviews, and commentaries that highlight new and emerging trends in global cancer epidemiology, including but not limited to:

- Cancer incidence, mortality, prevalence, and survival trends across different populations and geographic regions
- Novel data sources and methods for cancer epidemiology research, including genomics, digital health, and machine learning
- The impact of social, environmental, and lifestyle factors on cancer risk and outcomes, including the role of diet, physical activity, and air pollution
- The effectiveness of cancer prevention and control strategies at the population level, including screening, early detection, and treatment

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok
Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
