

Special Issue

Histopathology and Diagnosis of Gastrointestinal Tumors

Message from the Guest Editors

As the diagnosis is established by a transdisciplinary team, the aim of this Special Issue is to collect papers referring to all the examinations necessary for a proper diagnosis of common cancers but also of rare types of tumors. The diagnosis involves gastroenterologists, imagisticians, surgeons, pathologists, and geneticists but other specialists in the field might also be involved. We welcome papers that involve histopathological analysis but papers on serum examinations and new trends in preoperative diagnosis are also welcomed to be explored. The investigations carried out for the prediction of prognosis or to indicate an individualized therapy might also be part of the Special Issue. Any research or review-type papers that include data focused on diagnosis, from serum to tissue biomarkers and circulating tumor cells, are welcome. If some papers are mainly based on in silico analysis or examination of public gene databases, they should include an external validation on their own cohort. Your individual contribution to research on diagnosis tools might be helpful for doctors involved in the diagnosis of gastrointestinal tumors and provide new hope for oncologic patients.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
