

Special Issue

New Sight of Gastro-Intestinal Cancer

Message from the Guest Editor

The scope of this Special Issue is to provide new insights into different forms of gastrointestinal cancers, including, but not limited to, oral cancer, gut cancer, colorectal cancer, and conditions predisposing patients to malignant processes, such as lifestyle factors and inflammatory bowel diseases, i.e., ulcerative colitis and Crohn's disease. Original research as well as review papers dealing with the development, progression, prevention, and management of gastrointestinal cancers are welcomed. Thematic emphasis will be given especially to papers focused on the role of nutrition, inflammation, and microbiome in these malignancies.

Guest Editor

Dr. Justus Reunanen

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
