Advances in Biliary Tract Cancer: Multidisciplinary Perspectives in Surgery, Endoscopic Management, and Epidemiology

Message from the Guest Editor

Biliary tract cancer (BTC) encompasses a heterogeneous group of malignancies with complex anatomy and diverse biological behavior. Despite recent advances in diagnostic imaging, endoscopic technology, and perioperative management, BTC continues to present major clinical challenges. This Special Issue aims to provide a multidisciplinary platform addressing innovations in surgical approaches, endoscopic interventions such as ERCP and biliary drainage, epidemiological trends, and translational research. We welcome original studies and comprehensive reviews that contribute to improving patient outcomes through integration of surgical, medical, and endoscopic perspectives. Dr. Hiroyuki Kato

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
