Oncogenes in Cancer

Message from the Guest Editor

The first oncogenes were discovered more than three decades ago. Since then, a remarkable development has been achieved by the scientific community in order to unravel the biological impact of those oncogenes in the development and progression of different neoplasms and their potential clinical applicability in designing targeted therapies. All this knowledge has made it possible to think of a personalized treatment of cancer. In this Special Issue entitled "Oncogenes in Cancer", we approach the role of actionable genomic somatic alterations able to driver different solid tumors, their biological context, and the different therapeutic strategies evaluated. This Special Issue has being conceived as a comprehensive review of the most frequently present oncogenes in major solid malignancies, updating the most relevant advances leading to the development and eventual approval of new targeted therapeutic compounds.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
