

Special Issue

Management of Locally Advanced Cervical Cancer

Message from the Guest Editors

In this forthcoming Special Issue, a motivated international team of experts from many medical disciplines will address a comprehensive scope of topics. Topics ranging from a description of the history, epidemiology and demography of patients with LACC, to clinical reviews and original papers on diagnosis, the role of radiotherapy and combined modality treatment, the role of surgery, particularly for nodal disease and for recurrent disease, and the promises of innovative drugs and therapeutic vaccination are all welcome.

Considering the major burden of disease and its treatment, the management of late toxicity, and preservation of quality of life will be covered in separate chapters. Since social and economic determinants strongly determine the fate of women with LACC, we will pay special attention to social and economic issues, such as the organization and cost of care for women in low-, middle- and high-income countries.

Guest Editors

Prof. Dr. Lukas Stalpers

Dr. Constantijne H. Mom

Dr. Maaïke A. Van der Aa

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
