Recent Advances in Reconstruction and Surgery for Breast Cancer

Message from the Guest Editor

The aim of this Special Issue entitled “Recent Advances in Reconstruction and Surgery for Breast Cancer” is to propose a collection of manuscripts about this topic, reviews, or original studies. During the last few years, new and important advances were reported in breast surgery de-escalation for axillary surgery and breast surgery, particularly after neoadjuvant therapy. Reconstruction techniques after mastectomy have also been proposed with new data, particularly after nipple-sparing mastectomy. Endoscopic and robotic techniques also represent a rapidly expanding field.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Axillary surgery with de-escalation;
- Breast up-front surgery or after neoadjuvant therapy;
- Breast reconstructions: techniques, results;
- Autologous fat reconstruction;
- Free flap breast reconstruction;
- Implant immediate breast reconstruction;
- Endoscopic and robotic breast surgery;
- Monitoring after mastectomy with reconstruction.

We are pleased to invite you to propose manuscripts on this topic. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
