Current Strategies in Pancreatic Cancer Management: Intense Systemic Treatment and Aggressive Local Tumor Control. When Shall We Do What?

Message from the Guest Editor

Treatment of patients with pancreatic cancer is still a major problem especially due to aggressive tumor biology itself and the potential high morbidity of surgical treatment. The aim of the Special Issue is to focus on novel systemic and local therapeutic approaches, finding the ideal therapy sequence for each individual patient. Revolutionary steps in medical oncology such as immunotherapy and liquid biopsy may further contribute to improving treatment. Radical surgical exploration with vessel orientated resections makes pancreatic surgery safer and more radical. In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
