Peripheral T-cell Lymphoma: From Biological Research to New Therapies

Message from the Guest Editors

Peripheral T-cell lymphoma (PTCL) is a heterogeneous group of non-Hodgkin lymphomas (NHL) that originates from mature T-cells, including PTCL, not otherwise specified (PTCL-NOS), anaplastic large T-cell lymphoma (ALCL), angioimmunoblastic T-cell lymphoma (AITL), NK/T-cell lymphoma, and adult T-cell leukemia/lymphoma (ATLL). PTCL is generally aggressive and has a poorer prognosis than diffuse large B-cell lymphoma. Genomic analyses of some types of CTCL such as ATLL, ALCL, and PTCL-NOS have been performed so far, and the involvement of important somatic gene alterations including T-cell receptor signaling pathways has been clarified. Furthermore, the relationship between genetic mutations and prognosis and prediction of the effectiveness of anticancer drug treatment have been clarified. However, most PTCL are generally not curable and thus prevention of disease progression and development of new treatments are urgently needed. For this Special Issue, we encourage the submission of original research articles and reviews on any aspect of PTCL, including critical signaling pathways, host immune responses, and novel targeted therapies.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
