Special Issue

Advances in Parathyroid Carcinoma: From Bench to Bedside

Message from the Guest Editors

Parathyroid carcinoma (PC) is a rare endocrine malignancy. This Special Issue of *Cancers* aims to explore recent advances in PC, particularly its molecular pathogenesis, diagnosis, and management, but also expand the knowledge of the pathways involved in its pathogenesis and discover candidate biomarkers useful in pre-operative diagnosis, prognosis, and management. In this Special Issue, basic, translational, and clinical research studies and reviews are welcome. Research areas may include (but are not limited to) the following: omics approaches, translational research, surgery, medical therapy, and personalized medicine. Prof.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
