

Special Issue

New Technologies in Prostate Cancer: From Diagnosis to Treatment

Message from the Guest Editor

This Special Issue aims to explore cutting-edge, new technologies that may, in the near future, be able to change the current diagnostic and treatment pathways of prostate cancer. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Artificial intelligence;

Radiomics;

PET/MRI;

New PET tracers;

Liquid biopsy;

New genomic markers;

Telemedicine;

Augmented reality;

New and developing robotic systems;

Single-site surgery;

Telerobotic surgery;

Radio-guided surgery;

Focal therapies;

Theranostics.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
