

Special Issue

Unique Perspectives in Cancer Signaling

Message from the Guest Editor

We are pleased to introduce a Special Issue on cancer signaling with a focus on unique, interdisciplinary perspectives for investigating key pathways that drive cancer initiation and progression. These perspectives can entail novel technological–computational implementations, translational–clinical-level applications, or even epidemiological enhancements of basic science understandings. Across these diverse inquiries, this edition on “Cancer Signaling” aims to define nuanced contexts surrounding oncogenic signaling for the development of therapeutic and preventive strategies against various cancers. Reviews are expected to focus on specific disease types or signaling pathways through a multidisciplinary lens. Original research articles with a focus along these scopes will also be considered.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
