

## Special Issue

# Rare Tumors in Children: Trends in Diagnosis, Treatment and Prevention (2nd Edition)

### Message from the Guest Editors

Regarding rare diseases, the possibility of conducting clinical studies on both diagnostic and therapeutic aspects is limited. Therefore, national and international collaborations have been active for many years in order to conduct meaningful clinical studies. These scientific and clinical networks have made it possible to achieve significant results in the field of pediatric oncology. Nevertheless, not all children and adolescents with tumors have benefited from these efforts. Rare cancers are therefore 'orphan' diseases characterized by limited clinical experience, a lack of shared guidelines and little investment in research. However, in recent years, these rare diseases have attracted more attention and a number of collaborative groups on rare cancers have been established, with the aim of fostering the circulation and exchange of useful information in both the diagnostic and therapeutic phases. This Special Issue will highlight the current state of the art and trends in the diagnosis, treatment and prevention of rare tumors in children. All original research articles and reviews are welcome.

### Guest Editors

Dr. Antonio Ruggiero

Pediatric Oncology Unit, Fondazione Policlinico Universitario A. Gemelli IRCCS, Università Cattolica Sacro Cuore, 00168 Rome, Italy

Dr. Stefano Mastrangelo

Pediatric Oncology Unit, Fondazione Policlinico Universitario A. Gemelli-IRCCS, Università Cattolica del Sacro Cuore, di Roma Largo A. Gemelli, 8, 00168 Roma, Italy

### Deadline for manuscript submissions

1 April 2026

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
