Fertility Preservation in Oncology

Message from the Guest Editors

Over the past two decades, advances in oncological treatment have increased survival rates for most forms of cancer. This remarkable result entails a significant number of young women facing infertility in the future because of the gonadotoxic effects of chemotherapy and radiation. Fertility preservation in oncology is a novel field of research that is becoming crucial in patient management, and is closely related to quality of life of cancer survivors. This Special Issue aims to strengthen knowledge in the field of gonadal toxicity, focusing on mechanisms of damage and possible strategies for ovarian protection. It will also improve understanding around current and future fertility preservation strategies, i.e., oocyte and ovarian tissue cryopreservation, fertility-sparing surgery, and the use of fertoprotective agents. In this Special Issue, original research articles and reviews are encouraged. Both pre-clinical and clinical studies will also be included. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
